

OneSizeFits1 - Every Child is Different

Student engagement Session no.1

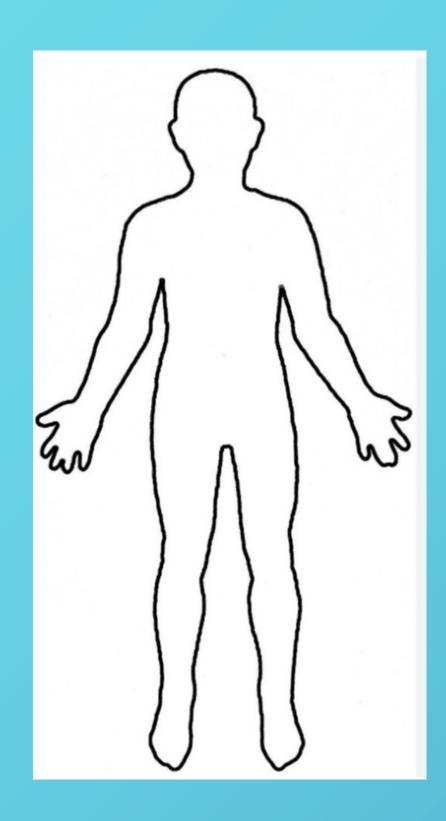

BSMS/SameSky creative event 2024

Session Overview

Introducing ourselves "Individual bodies" drawing exercise Brief sharing and discussion The challenge of communicating this research Overview of personalized medicine and BSMS research Imagery and communication - discussion More about our event Overview of the brief

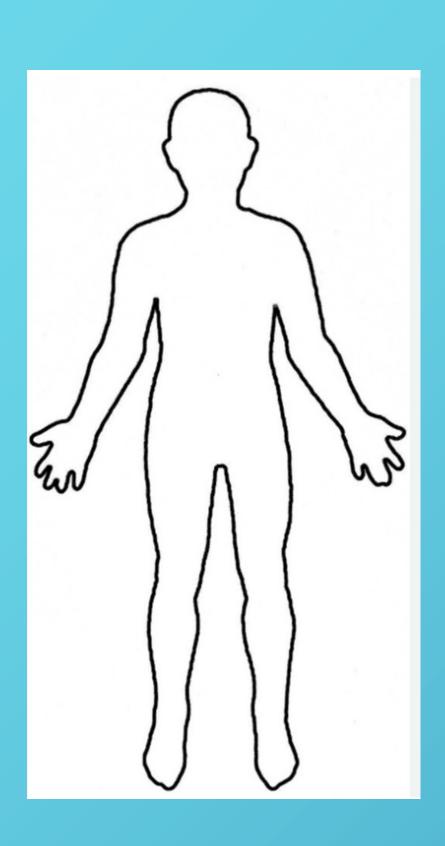

NTRODUCTION ACTIVITY

nd an object close by that can sa something about you

DRAW AN OUTLIN OF A BODY

h words, images or other marks, add to your drawing thing that shows or represents or describes

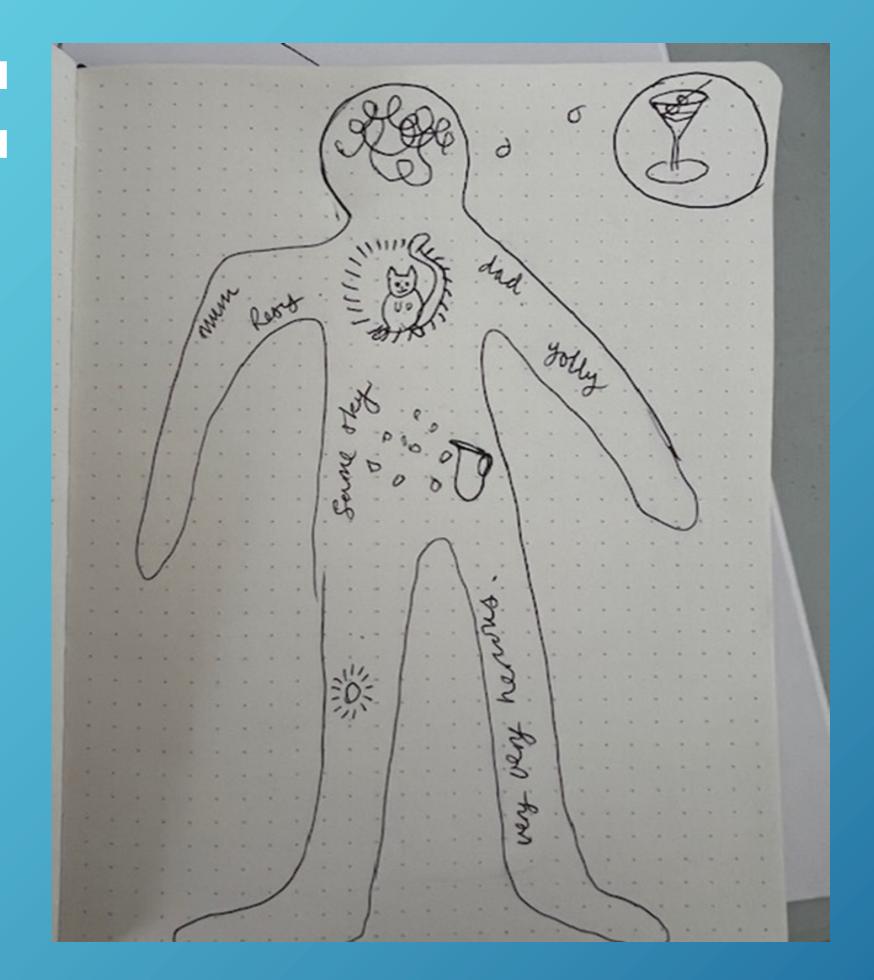

- What they had for lunch
- A thought they are having
- A feeling or emotion they are experiencing
- Something they are doing now or today
- A problem they are having
- Something or someone they love
- A hope they have for the future

Our example:

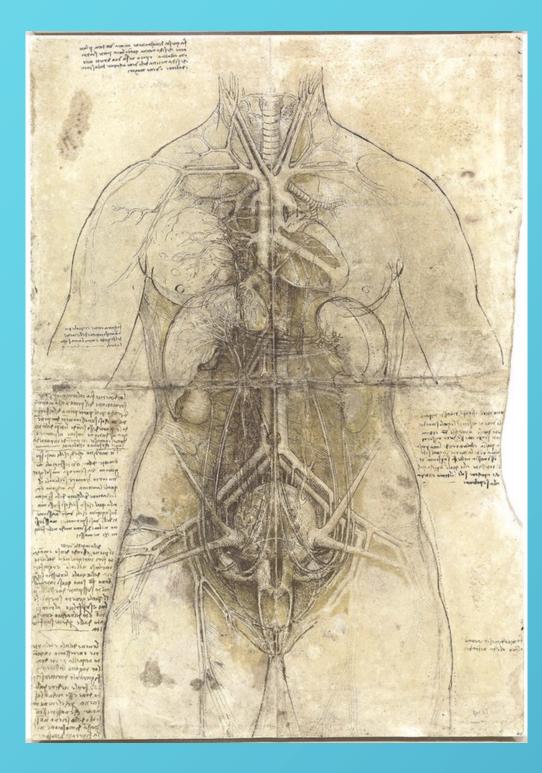

ove my cat so I put him here in my art space

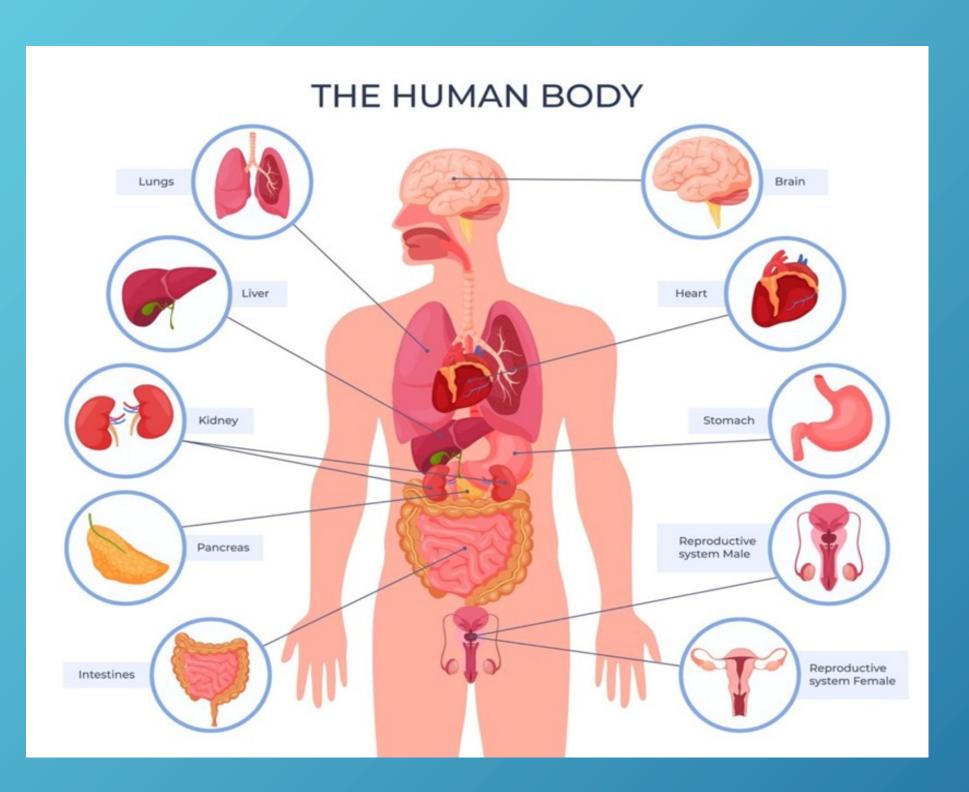

My knees feel wobbly when I'm rvous

e people I love surround my heart m thinking about a lovely G&T later night!

re other examples of how art has portrayed the human body, the first being Da Vinci's work:

o Da Vinic's Anatomical drawings.

Modern artistic depiction of the bodily organs

Lets share

show our body pictures and look at the differences

ere have we put the different elements? Where are they elation to the body?

How have we represented them?

WHAT MAKES US INDIVIDUALS?

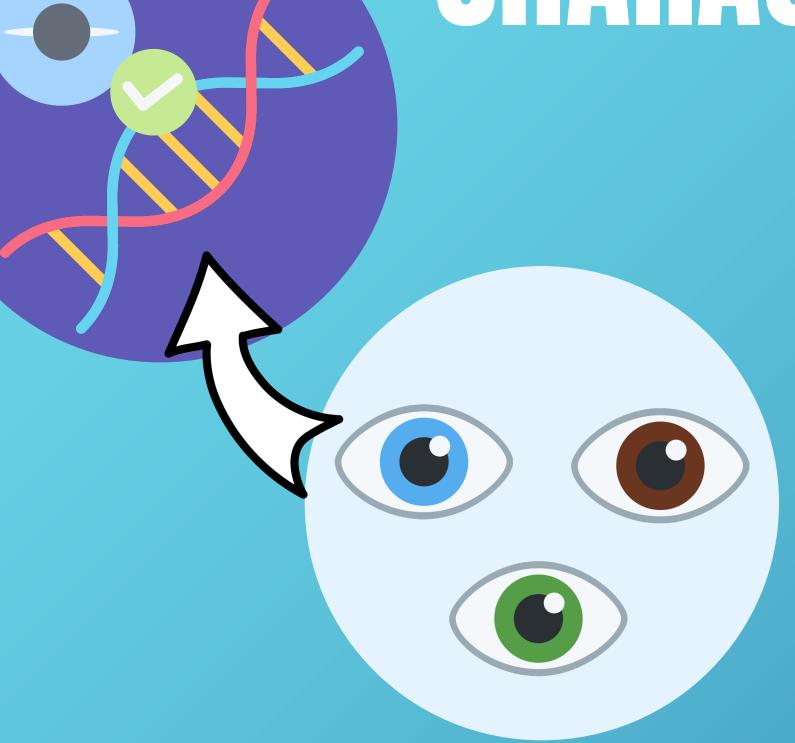

GENETICS CHARACTERISTICS

Some of our indiv differences such a physical characteristic determined by our g

How can this affect out health?

mes the specific characteristics we can affect the way our bodies respond nvironment around us.

ave blue eyes, they will be more e to the sun!

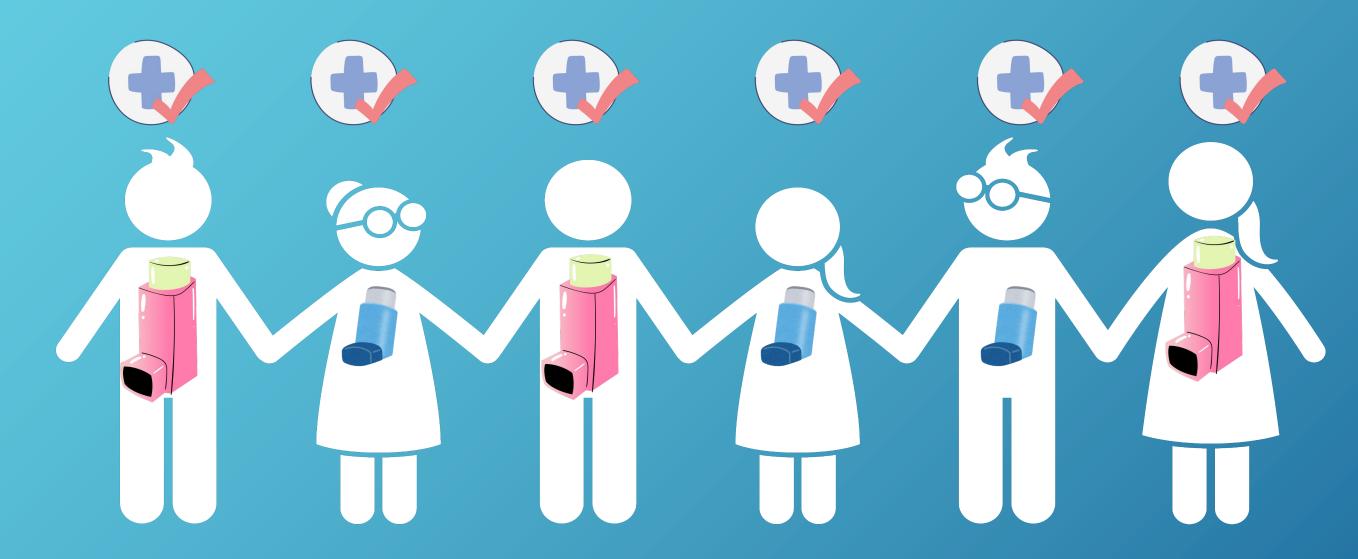

PERSONALISED MEDICINE

PERSONALISED MEDICINE

use our research to try and find out what medication will work for ople.

understand genetics differences, we can work out what treatments

COMMUNICATING THIS RESEARCH

step of this work is to try and communicate this
to the patients themselves!
to educate and raise awareness so that people know
arch can help them or their families.

THE BRIEF

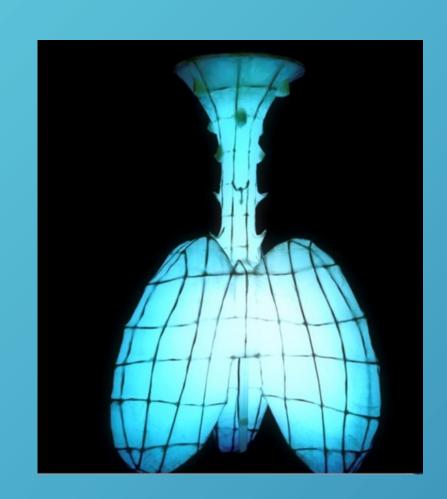

ould like you to create an image, text, a video piece that can be included in our exhibition/ With the title:

hat does personalized medicine mean to me

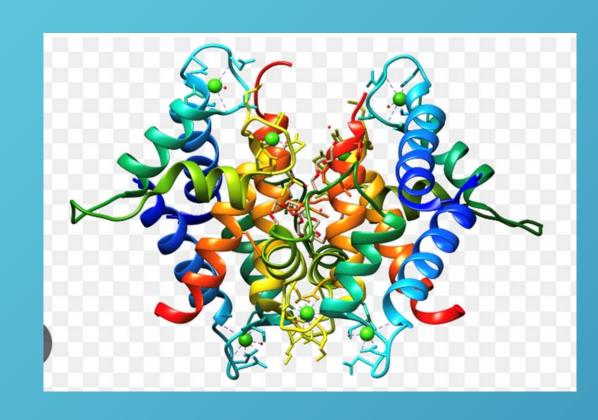

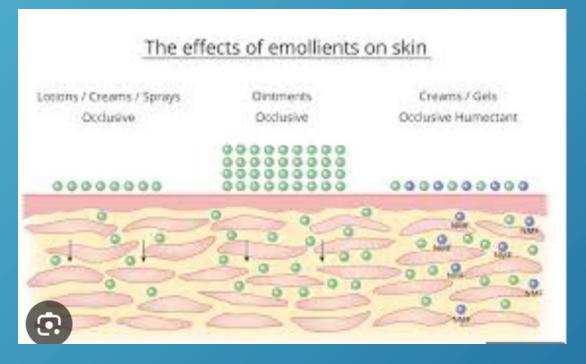

Examples

My throat tickled and itched and I coughed
I felt constricted, inflamed.
My ribs ached.
I did not automatically breathe in and out,
I had to think – keep doing this, keep breathing.
