

# Inclusion Health Day 2019

## Overview

Our 5th BSMS Inclusion Health Day will focus on the value of Expert by Experience (EbE) involvement in research, service development and education in Inclusion Health, and the importance of support in improving health outcomes.

## Topics

Our programme will include a range of topics highlighting the variety of positive outcomes produced by working collaboratively and productively with EbEs to improve the quality of services and initiatives.

We will also examine the crucial role of individual support, both from peers and professionals, in determining positive health outcomes.

With input from nationally recognised leaders in their fields and experts by experience, delegates will have time for discussion, reflection and networking.

Sessions include:

- Co-producing research with EbEs
- Support on discharge from hospital
- Positive outcomes for EbEs involved in service development

## Who should attend

Everyone concerned with the health of people who are homeless, Gypsies or Travellers, vulnerable migrants or sex workers. In particular, healthcare workers, support and keyworkers and service managers.

## Academic Leads

**Dr Nigel Hewett**, Medical Director, Pathway and Faculty for Homeless & Inclusion Health

**Dr Chris Sargeant**, Senior Lecturer BSMS, GP Arch/Pathway Homeless Team, Pathway Education Fellow
