

Mental Health in Primary Care

Brief course overview

This one day update for primary care workers will focus on improving organisational awareness of, and responsiveness to, mental health challenges. Suitable for both clinical and non-clinical staff, this annual update will help to improve patient pathways through seminars, group work and case studies.

Topics

- Acknowledging, recognising & triaging MH conditions (non-clinical)
- Diagnostic & pharmacological updates (clinical)
- Locally Commissioned Services (LCS)
- Referral systems & processes
- Consultation skills: health promotion; self-care; CBT in primary care
- Management of long-term MH conditions

Who should attend?

GPs, Nurses, Receptionists, Physician Associates, Pharmacists, Medical Secretaries & all primary care staff

Certification

A certificate of attendance will be provided

Who will teach it?

Led by Prof Harm Van Marwijk, Professor in General Practice, and taught by clinical staff, service providers & service users

Where and when will it run?

18th September 2018, 9.30am - 4.30pm
BSMS, University of Brighton,
Falmer Campus, Brighton BN1 9PH
